## PNEUMATIC EQUIPMENT FOR LUGGAGE COMPARTMENTS

### DESCRIPTION

- Pneumatic system for opening side luggage compartment covers, for intercity vehicles.
- Pneumatic opening means a single cover can be installed on each side of the vehicle.
- Solenoid valve control.
- Sensitive bottom edge option.
- Locking cylinder inside the luggage compartment, can be manually unlocked.

### ADVANTAGES

- Enables the use of large covers (up to 4.5 metres long)
- Driver ergonomics.
- Pantographic vertical movement requires less lateral space for opening.
- Locking device with cover closed. The cover does not need a lock.
- This system gives greater security for the driver and passengers.
- Lateral shock absorbers for greater ease of opening.
- Improved vehicle appearance.
- Needs no handles or locks on the covers.

### TECHNICAL DATA

- Minimum pressure: 6 bar.
- Working temperature:  $-30\text{ }^{\circ}\text{C}$  to  $+70\text{ }^{\circ}\text{C}$
- Nominal voltage:  $12/24\text{ V} \pm 20\%$
- Complies with regulation UN R107.
- For Class II and III vehicles.
