

020a SWYNCRO

OUTWARD OPENING HORIZONTAL DOOR

DESCRIPTION

- High-end outward-opening door.
- Plug-and-play system, with all components integrated into the door.
- Fully horizontal movement, eliminating the need for wedges or tension bars.
- Electrically operated system with pneumatic latches and a pneumatic emergency system.
- The door incorporates both the emergency mechanism and the lock.
- For enhanced safety, it includes a door-closed sensor.
- Maximum availability, with semi-automatic closing in the event of a power failure.
- Includes centralized locking and remote control.

ADVANTAGES

- Maximum watertightness, without wedges or tension bars, allowing a gasket seal around the entire perimeter.
- Integration of all systems into the door, reducing installation time.
- Anti-vandalism system.
- Designed for safety and comfort.

TECHNICAL DATA

- System for coaches. Class II, III.
- With Masats Evolution DCU.
- Maximum control, safety and availability.
- Nominal voltage: 24V
- Compliant with Regulation 107
