

# 012g

## OUTWARDS OPENING DOOR pneumatic - special airport bus -

### DESCRIPTION

- Pneumatic outside opening kit, without lifting movement.
- Suitable for passengers exit.
- Sensitivity system by valves or contact rubbers (optional)
- Free door emergency by pneumatic push buttons.
- Emergency system cancellation when speed is > 2 miles/h.
- Special designed for airport buses
- Door-fixing arm and Tie rod located under the floor.

### TECHNICAL DATA

- Minimum pressure: 87 psi.
- Working temperature -22°C + 70°C
- Nominal voltage 12/24v ±20%

### ADVANTAGES

- Upper position of mechanism.
- Rubber sealing in all perimeter.
- The mechanism-free floor makes access more fluid and creates more interior space.
- Enhanced passenger flow.
